PROJECTS

A Kid's learning platform

1. The main feature of the project was to develop a interface for kids where they can learn in different languages like English, Hindi, Tamil, Telugu.

2. The different languages text were also converted into sounds using node JS.

3. Created custom modules to convert the different languages text into sounds (a text to speech.

Tech stack used -: React js, node JS, Mongodb , redux for state management
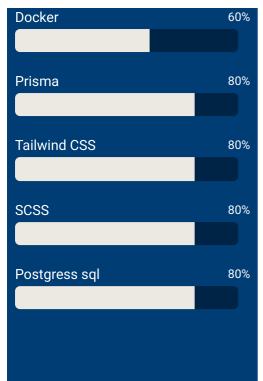

Travel website

1. Created a full stack travel website along with admin panel to manage hotels, travel packages, and ferries.

Online tickets generation for ferry booking and sending to user email.

2. Created features for online booking of ferries and hotels in Andamans.

3. Integrated payment gateways for online booking.

Tech stack :- React js, node js, mongodb, redux toolkit.

Skill	Level
Docker	60%
Prisma	80%
Tailwind CSS	80%
SCSS	80%
Postgress sql	80%

Steel admin Dashboard

1. Created a fully functional admin dashboard using react js and node JS for a Android application.

2. The application consists of retail, selling and marketing of steel plants across India.

3. Admin can update the stock prices and upload excel files for stock management.

An online learning platform similar to Udemy

1. This project consists of online education platform features similar to udemy.

2. Implemented complete backend and frontend using node js, react js, mongodb.

3. Implemented feature for online live classes using webrtc and websockets.

Tech stack-: React js, node js, mongodb, redux toolkit.

Transportation backend apis

Created apis using node js and sails js for a project that is transportation.

Tech stack :- node js, sails js , mysql, mongodb , typeorm.

Truck Project

1. This project is about selling and buying trucks online.

2. Trucks will be uploaded by admin dashboard. Which was created in react js

3. Users can bid on trucks and higher bidding will be considered as a winner.

4. Implemented Internationalization in react js.

5. Utilized typescript along with react js
